Temporary placement of Roll-offs (dumpsters) and Storage Containers in the Public Right-of-Way.

Things to know before you apply for your permit.

1. Call the Engineering Inspection Hotline (310) 937 6653 for a Pre-Inspection, call before 3:00pm to be scheduled for the following business day. This is required so City Inspector can verify current conditions of the Public Right-of-Way (Pavement, Curb etc.) and the Street (One Way, “No Parking” restrictions).

   Please provide the following information:

   Contact Information – Name and Telephone No.
   Location - Address (containers are typically approved for placement in front of your property, if this is not possible, you must notify potentially affected property owners and provide City with a letter of consent.)
   Reason - Why do you need the container?
   Start Date - When do you need to place the container in the right of way?
   Duration - How many days will you need the container? (For storage containers, maximum allowable days is 6 days. For dumpsters for construction related usage, allowable days is 6 months.)
   Square Footage - What are the dimensions of the container? For example, 8-feet wide by 16-feet long.

2. For the Roll-off or Storage Company, an approved Liability Insurance and a valid of Redondo Beach business license are required prior to permit issuance. Call Engineering Permit Counter at (310) 318 0661 to verify this.

3. Once the pre-inspection is done, come to the Engineering permit counter, located at 415 Diamond St. Door E, Redondo Beach CA 90277. Fill out application form, if homeowner is pulling the permit we will verify ownership (if renting, a copy of the lease is required). If contractor is pulling the permit (if other than the owner of the company is pulling the permit), we need to verify if we have notarized authorization signature on file.

4. Permit fee includes a base fee, inspection and deposit. Payment should be made in the form of a check or cash. If paying by check, payer information should match with check information. Third party checks will not be accepted. (Please see fee schedule).

5. Once the container is picked up, call the Engineering Inspection Hotline to request for a final inspection. If there is no damage to the Public Right of Way, the deposit will be processed as a refund and will be mailed to you. This process typically takes 4-6 weeks once the permit is finaled.
