Mosquitoes spread serious diseases, like West Nile virus.

West Nile virus can cause severe illness, even death.

**West Nile virus is dangerous for people over 50.**
It can cause long-term health problems including:
- Difficulty walking
- Loss of independence
- Memory loss

Protect yourself and your loved ones from West Nile virus.
- Wear mosquito repellent when outdoors. Use spray, wipes or lotion.
- Wear long sleeved shirts and pants.
- Avoid areas where mosquitoes are common, like lakes or rivers.
